The techniques taught are **user-friendly to all readers**, regardless of graphology experience.

This manual provides **visual/pictorial maps** and **psychological descriptions** of both **mentally healthy** and **dangerous** traits. It further describes character traits which tend to **facilitate** or **inhibit** dangerous behavior.

This psychological assessment tool (a compendium of data and directions) identifies the **dangerous/violent personality** and provides a method for confirming educated guesses by way of critical examination.

It includes sections on **Primary Signs of Dangerousness (D)**, **Facilitators to Dangerousness (F)**, and **Inhibitors to Dangerousness (I)**. It is generously illustrated with handwritings and biographical sketches.

The result of a **ten-year research project** at Hawaii State Hospital, it is a comprehensive study of **potential dangerousness**. The danger signals are clearly revealed and documented using handwritings of people throughout history.
